

The Disaster drill while having fun “IZA ! KAERU CARAVAN !”

What' s "Iza ! Kaeru-Caravan !" ?

It is an event that combines local disaster drill and toy exchange bazaar created by artist Hiroshi FUJI. The purpose was to invite more young families to disaster prevention events.

This program started in Kobe in 2005 and now is spreading to many areas. It can be arranged according to the local characters.

EXTINGUISH THE FIRE!

SAVE THE PEOPLE!

Kaeru-Caravan in Mukojima

Cultivating the leaders in next generation by the original program

In Mukojima, the aging of the leaders of disaster prevention activities has been a problem. So they started the “IZA! KAERU CARAVAN” in 2009, were able to increase the children's participation. Number of participants have been increasing, and they have become to positively plan and arrange the programs to make them to be their originals.

In 2015, 18 organizations collaborated and developed programs in which children can enjoy. "Mukojima Seniors Counseling Room" was in charge of a program "Become a Senior and Experience Flood". Participants wear goggles for visually impaired and put weight on feet, and escape by stairs to above the high flood level. This program aims to let children aware of history of flood, local culture and aging problem, and also cultivate the leaders in next generation.

Workshop to "prevent furniture to fall over"

Disaster prevention is spread in the world

The “IZA! Kaeru Caravan!” is extending its activities in other countries while understanding the regional characteristics and proposing disaster prevention activities suitable to the region. A tool to use in disaster prevention programs are also using something familiar to life in each region.

Countries that have held the “IZA ! KAERU CARAVAN !”

For example, frog motif, because it has apply a "return" to the frog in Japan. However, the motif of another animal is abroad, has began to penetrate the region.
