PART 2: WORD ASSOCIATION

This activity asks you to connect words based on associations.

Directions: Look at the first word. You must give 5 words in English that can be associated with the word before it. You can use words you know, or you can check your dictionary to learn new words.

Example

banana

- monkey
- zoo
- visitors
- money
- job

In this example, if there is the word “banana”, then you can say that monkeys eat bananas. That’s an association. Monkeys can be found in a zoo. That’s also an association. Visitors go to a zoo, and visitors can only enter a zoo if they have paid money to do so, and to get money they would need a job. Do you see how each word is connected to the word before it?
